## Colours' Words and their Semantic in Pre-Islamic and Islamic Poetry

*Ibrahim M. Khalil* \*

### ABSTRACT

This study aims at dealing with names of colours in ancient Arabic, especially in Pre-Islamic poetry as well as Islamic poetry. Also, it aims at observing the metaphorical and mytonymical meanings which we can find in the context of colour use. In English we can hear many examples of such metaphorical uses; such as, black market, black idea, blue day, black moon, green old age, green hand... and so on.

This kind of study is very few in Arabic, because Arab authors are always interested in the lexical meaning only. So, I think, this research gives us the newest conclusion in Arabic Semantics.

**KEYWORDS:** Condition, Semantic, Context, Metonymy, Colour, Metaphor, Vocabulary, Lexical Deviation.
