## Suprasegmental Phoneme in Arabic

*Waleed Hussein\**

### ABSTRACT

This research attempts to study the Suprasegmental Phoneme in Arabic such as: intonation, stress, length, and Juncture.

This research has been based on two dimensions:

- The first of which represents the theoretical aspects of Suprasegmental Phoneme, indicating its meaning in modern linguistics. It also deals with two terms: Prosody and Suprasegmental Phoneme.

It indicates, as well, the various concepts and characteristics, dealt with the Arabic language.

- The second dimension comes out in view of the concept that early Arab linguists tended to mean by phonological variation of pronunciation and articulation.

It concludes that early Arab linguists had known many theories concerning language system which appear in modern linguistics.

**Keywords:** Suprasegmental Phonemes, Linguistics, Intonation, Stress, Length, Juncture.
